Public Schools Hold First Track Meet

Jubilee Park was thronged with eager pupils on Saturday, when first inter-public school track meet of the Abbotsford-Sumas-Matsqui area was held. Representing fifteen schools, the youngsters entered the sport with great vigor, and the day's proceedings greatly enjoyed by everyone, were a credit to the organizers.

Matsqui's public school athletes swept the prize board of all major trophies, as follows:

Province challenge trophy for highest aggregate of points.
Sumas Council senior challenge trophy.
Matsqui Council intermediate challenge trophy.

Whatcom school carried away the junior challenge trophy offered by Abbotsford.

Medal winners for individual championships were:

Hazel Wasden, Highlands (sen. girl champion); George Knox, Huntingdon (sen. boy champion); Greta Vesterbach, Peardonville (intermed. girl champion); Phil Eadden, Whatcom rd (inter. boy champion); Francis Quadling, Whatcom rd. (junior girl champ); Norman Strickland, Whatcom rd. (junior boy champion).

Junior events, boys—
40 yd.: Norman Strickland, Whatcom rd.; Lee Murphy, Matsqui; George Ferguson, Whatcom rd.
60 yd.: Norman Strickland, Whatcom rd.; Lee Murphy, Matsqui; Ted Conway, Abbotsford.

Broad jump—Kanzo Matsui, Matsqui; Fred Taylor, Aberdeen; Donald Probers, Bradner.
High jump—Norman Strickland, Whatcom rd.; Don Smith, Ridgedale; Gordon Waterston, Huntingdon.

Relay race—1st, Abbotsford; 2nd, Matsqui.

Junior events, girls—
40 yards.—Francis Quadling, Whatcom rd.; Olive Mockford, Aberdeen; Noreen Delair, Whatcom rd.
60 yard.—Francis Quadling, Whatcom rd.; Veronica Kazantsoff, North Poplar; Leanne Lancour, Whatcom.

Broad jump—Francis Quadling, Noreen Delair, Beverley McDonald, Abbotsford.
High jump—Irene Gustafson, Matsqui; Noreen Delair, Leanne Lancour.

Relay race—Whatcom road, Aberdeen.

Intermediate events, boys—
50 yards—Kaori Matsui, Matsqui; Walter Ross, Abbotsford; Roy Duncan, (Continued on Back Page)

Fraser Now 22 Feet Rising, But Slowly

Yesterday the Fraser River rose seven inches, and last night came up another five inches, reaching the 22-foot level before noon today. Because of its expansive area, the raise will be slower now, even with continued heavy runoff in the interior.

A private dyke behind the main dyke gave out yesterday at Dewdney, and sand-bagging was found ineffectual. The main dyke in that area, although admitting a considerable seepage, is still holding. Patrols are now watching this and other sections down-stream.

Seepages have also occurred on the Matsqui side of the river, one, although not large, has flooded part of Frank Beharrell's farm near the bridge. Mr. Beharrell is watching the levels very closely, and getting very little sleep because of all-night vigils. Generally, the dykes seem to be sound, and although there is anxiety, the swollen river is not yet alarming. A level of 23 feet has been previously reached upon several occasions without floods.

Wind is a danger that the settlers

CLAYBURN

George Feltren has secured employment up the coast.

Miss C. Gillies, and small niece Margaret Kiehl, are visiting at the home of Miss Gillies' parents.

Thompson Kirkpatrick has returned home after visiting his parents.

Jessie Peachy and May Donke have been chosen by the C.G.I.T., as the members to be sent to the camp at Ocean Park in July.

A meeting, conducted by Mr. P. H. Sheffield, official school trustee for this area, was held in the schoolhouse on Friday evening, for the purpose of voting on the continuation of the present school system. Mr. Sheffield showed moving pictures, including views of roads and schools in this area. It was unanimously voted by the ratepayers to continue the system.

Born.—To Mr. and Mrs. Gust. Borg, Matsqui, in the M.S.A. hospital on May 28, a daughter.

For, by creating a surface water movement, the tops of the earthen dykes would be then quickly demolished.

New Photo-Halftone Process Opens Up Illustration Possibilities for Small Papers

This alligator illustration, from a photograph by the editor, is the first cellophane half-tone printed in a Canadian newspaper. The half-tone is not of copper or zinc, as is customarily used, but of a celluloid composition, hard enough to withstand several thousand "impressions" of the printing press. The simple process of its making, direct photograph through a screen upon the sensitized celluloid, opens up a vast and economical field of development in reproduction of photographs for small newspapers. Indicating the possibilities, it may be stated that a single-column half-tone such as the one used would cost \$3.50 if made in the ordinary way. Cost of the cellophane is but 50 cents. Equipment is now being installed in San Francisco for this work, which, to publishers of small-circulation publications, will make possible pictorial records hitherto impossible because of high cost.

Born.—To Mr. and Mrs. A. McGaughey, Abbotsford, in the M.S.A. hospital May 31, a daughter.

Visitors at the home of Mr. and Mrs. Lamont over the weekend were Mr. and Mrs. Hynds of Seattle and Mrs. T. Shack and baby of Vancouver. Mrs. Shack continued to Seattle for a short visit.

NEWS OF THE SUMAS DISTRICT

Miss Marion McPhail, who is working in New Westminster, visited at her home here last week.

Mr. and Mrs. T. Delair and family spent Sunday at the home of Mr. and Mrs. Sam Campbell, Vancouver.

The funeral of Mrs. Ethel McLean, of Sprout, victim of an auto accident on Sumas lake highway, was held on Wednesday from Henderson's chapel, interment being made at Hazelwood.

Six automobiles and trucks passed into the ditches of Sumas lake highway within two days last week, along the section of highway where the fatal accidents recently occurred. Hot weather, followed by rain created a greasy surface to the "black-top" upon which traction was impossible for traffic, and many near accidents were narrowly avoided. A guide line is being painted down the centre of the highway by a road crew, working from the Chilliwack end.

The Stork Flourishes There

In past years The News has consistently boosted Sumas' many potential and actual advantages, and now there has come another discovery strongly in the district's favor—(according to the way in which you regard it, of course). A married couple, barren over their 10 years of wedded life, were blessed with the stork's arrival within 18 months after arriving on Sumas from Alberta. They relayed the glad news to another couple, life-long friends living on the prairies, and also childless. Eager to make a test, they came down here less than a year ago, and, we learn through the medium of the social grapevine, Sumas has again come through with honors. So, if Sumas is to become the Niagara Falls of the west, Dixon's colonizing troubles in this area are about over!

(Outside papers please reprint).

What Are the Facts?

In view of the failure of two competent, well-financed firms to successfully grow tobacco on Sumas, there is a great deal of scepticism in this district over the government's move in encouraging small farmers in the area to start growing the crop. An expert, formerly in the employ of one of the defunct growers, is to instruct land holders in growing methods, and 100 acres will be planted by 15 settlers. Tobacco—"straw" tobacco—can be grown almost anywhere, even Peace River valley settlers have managed to raise it. But to produce a commercially valuable grade seems to have been impossible for McKercher, who expended a large investment in buildings and processing machinery for his well-advertised "Totem" brand. And, if the withdrawal at a huge loss is any indication, also for Col. V. Spencer, who certainly very thoroughly tested Sumas' possibilities in respect to tobacco growing. Some kind of steady "cash" crop is an urgent necessity for Sumas lake area settlers, and it is earnestly hoped that this revival will prove satisfactory for the sake of the settlers who are staking their work and investments upon governmental advice.

Solidary visitors at the home of Mr. and Mrs. T. Delair were Verna and Milton Delair, Jack and Norman Whitton and Fred Enwright, all of Vancouver.

The provincial government announced on Saturday that any owner of land in an unorganized district may work out his arrears of taxes on provincial roads. Only one year's arrears may be worked out in this way.

In future the provincial government will charge only 4½ interest upon most deferred accounts owed to the provincial treasury. The rate has hitherto been six per cent.

The reduction will affect all land sale agreements, deferred dyking payments, sums owed to the department of industries and similar accounts, but not overdue income tax accounts.

Adjusting Debts to Conditions

Applications are being made by several lake area settlers for a scaling down of debts piled up against them in the purchase of land from the government, a special committee having been appointed to receive these. J. E. Land, chairman of the provincial water board, James Smith, settlement expert of the lands department, and Bruce Dixon, dyking commissioner constitutes the committee. It is now realized that substantial sums owing the government will never be paid, and rather than drive resident settlers off their holdings, the amounts must be reduced to sums the settlers are able to pay. The committee's function will not be to revise the agreements, but to make recommendations to the government.

A post-nuptial shower was given at the home of Mrs. G. Dobney last week in honor of Mrs. Haynes (nee Miss Thelma Sykes).

The history study club held their final meeting for the season last week at the home of Mrs. R. Gilmore.

MT. LEHMAN

Only prompt action saved the home of D. R. Nicholson on Sunday, when the roof started to blaze from a chimney fire.

At a meeting held on Wednesday evening, a lacrosse club was formed. J. Carter was elected president, D. Moran treasurer and J. Taylor secretary. A collection will be made for funds to help buy equipment for the team. Mr. Taylor has received a number of lacrosse sticks from Mr. Dan McKenzie of New Westminster, and it is expected that the boys will be playing the game shortly.

Jubilee P.T.A. held its annual picnic on Saturday at Ruskin flats. Some of the picnicers went by motor via Mission, and others left by boat from Marsh's Landing.

R. Pelon, who is working at Scheit, visited his home here last week.

BRADNER

Born.—To Mr. and Mrs. K. Imamura, Bradner, in the M.S.A. hospital on May 28, a son.

Under the auspices of the Sunday school, an interesting lantern talk was given last week. The subject was British Guiana and Japan, and the slides were described by Mr. Wallace Bennett of Vancouver.

F. Fatkin Bradner bulb grower, gave an address to a gathering of horticulturists in Vancouver last week.

ABERDEEN

A number of ladies met at the home of Mrs. Perry last week, to welcome her to the district.

The Aberdeen Birthday Club met at the home of Ms. Layman. Whist was played and the prizes were won by Mrs. Peterson and Mrs. Middleton.

The P.T.A. held their monthly whist drive at Aberdeen school on May 22, prizes going to Mrs. J. A. Gledhill and Mr. H. Larson; consolation, Mrs. Laird and Mr. J. Follis.

Mrs. Fridlington has left on a visit to her mother in Scotland. On her return she will make her home at Marguerite in the Cariboo.

Several Vancouver motorists were fined in Abbotsford police court last week on charges of speeding through the village. In one or two cases the defendants had no driver's licenses.

SQUIRE EDGE GATE—The Hold-Up Man took His Time

Facing a Big Deficit

The discovery that the operations of the Federal government for the fiscal year ending March 31, 1936, resulted in a deficit of approximately \$162,000,000, as announced by Hon. Chas. A. Dunning in the recent budget speech in the House of Commons must have come as a considerable shock to a large percentage of the Canadian people who must pay the piper.

The shock is not assuaged at all by the additional announcement that the increase in the sales tax from six to eight per cent. which the government decided to levy will not be a heavy enough impost to enable the government to balance the budget for the current fiscal year and that, on the other hand, the best that can be expected from this and other more minor levies is a deficit of something less than \$100,000,000 for this year.

Not much is to be gained by any attempt to lay the blame for this enormous deficit at the door of any particular administration. Doubtless politicians within the fold of the two major political parties will rise up and assert that the other party is at fault, in the one case the former regime and in the other the present administration, while adherents of other parties, who have not yet been given an opportunity to demonstrate their ability to govern the country, will declare that the economic system is to be blamed.

The fact remains that there is a shortage of \$162,000,000 as the difference between governmental income and outgo which has to be made up by approximately 10,000,000 people and the same number of people are apparently likely to have to make up another \$100,000,000 or a little less next year. The money must come out of the pockets of these ten million Canadians and apparently the only way to get it is by increasing taxation in some form or another.

The government has decided that the loss is to be made up partially by an additional levy of two per cent. in the form of sales tax, which means by the extraction of another two cents on every dollar spent by the consumers on practically "everything manufactured and produced in Canada." Hon. Mr. Dunning stated that by this means the government is placing the burden on "rich and poor alike." Whether it will work out that way in actual practice, it is almost impossible to say at this stage, whatever the intention may be.

It is axiomatic that in the final analysis the consumer must and does foot the country's tax bill, and it is a matter of history that sometimes business not only collects the tax from the consumer but a little bit more by adding a small profit on the tax as well as on the cost of the goods and the cost of their distribution. In this way a tax sometimes becomes pyramided by the time the goods on which they are levied reach the consumer.

The present system of collection makes this kind of thing possible and it is to be hoped that the government will take such measures as are necessary to see that the consumer is not forced to pay an additional tribute to retailers, jobbers, wholesalers and manufacturers, or any of them as a result of the increase in the sales tax.

For any government, of course, a sales tax or an increase in sales tax, is one of the easiest ways of securing revenue from its subjects. Within a couple of months people will have forgotten about the budget and that they are paying another two per cent. towards governmental administration on practically everything they buy, because it is a hidden impost.

In this connection there would seem to be some merit in the sales tax system in vogue in the State of Oklahoma where the tax is collected by the retailer and where the retailer is required to show on his bill to the customer the price of the article and the amount collected in tax as a separate item.

This system, while unquestionably irksome and cumbersome to the retailer, at least has the advantage of making the consumer "tax conscious" in the same way as has a direct income tax. Every time he makes a purchase from a nickel upward he is made to realize that he is making a contribution to the government and the amount he is contributing. If this system were in effect throughout Canada, no doubt it would result in greater pressure being brought to bear on the government to economize and might act as a deterrent in the number of requests made to the government for expenditures which might be avoided.

There are, on the other hand, some very potent arguments against the adoption of such a system of tax levy and collection. It would often result, no doubt, in efforts on the part of consumers to induce the retailers to absorb the tax and where competition is keen might result in injustice to the merchants. In addition to which, the time that this method of billing and collection would require, would no doubt, entail extra cost to the merchant which, under present conditions, he could ill afford.

Sounds Like Good Idea

Children In England Learning Problems Of British Railways

"Great Britain is the only country which trains its children in modern transportation," says T. R. Dester, of the Associated British Railways, in discussing a nation-wide educational program for children recently started.

"Not satisfied with mere rapid mechanical development, the heads of British railways have realized that, in the long run, the position of their roads depends directly upon public understanding of rail transport problems. Realizing that transport is for the ages and not merely for the adults of to-day, they have begun to teach the children the fundamental facts of railroading, and are conducting a series of nation-wide demonstrations for school children. Over 40,000 children have attended these. Instruction in every branch of railroading, from locomotive driving to signal systems, is given to children by competent instructors, on special demonstration cars which are routed throughout the country.

"The eventual result, it is believed, will be a sympathetic understanding by the whole people of the Empire's railroad problems."

Glass dating back to 1400 B.C. has been found in ancient Egyptian tombs.

HOW'S YOUR BLOOD?

weak, follow the advice of Mrs. Rose Cook of 101 Walnut St., Hamilton, Ont., who said: "My daughter, Doris, (picture above) was in a badly run-down condition when she was six years old. She was quite thin, had no appetite and had pimples on her face, caused by faulty elimination. Dr. Pierce's Golden Medical Discovery built her up so that she ate better, gained weight and the pimples cleared up. Buy now! New size, Tablets 50 cts., Liquid \$1.00 and \$1.50."

Temple To The Sun

Building In England To Have 7,500 Feet Of Gardens

A temple to the sun with 7,500 square feet of hanging gardens is rising in England in the midst of one of South Hackney's most populous districts.

It is an experiment by the Bethnal Green and East London Housing Association in which housing experts, builders and architects have worked together to evolve the "sun and air home" of the future.

"We were faced with the problem of making the flats as much like houses as possible," said the architect, J. E. M. Macgregor, "and so we provided each flat with its own private garden on the same level."

The first section of the "sun temple", containing 16 flats, each with a minimum of 200 square feet of hanging garden open to the sky, will be completed in the near future.

Even on a dark day the building, with its yellow brick walls and red tile roof, suggests sunshine.

To make the gardens possible a new kind of building of pyramid shape was devised, the flats being built in receding steps around a covered hall. This hall will be let as a market.

It is one of the first buildings in the world to be built on the cantilever system.

Received An Answer

"Good gracious!" shouted the schoolmaster. "I ask you the simple question, 'what is a fortification?' and get no answer!"

The scholars stared, but no one answered. The master tried again.

Pointing to the boy at the bottom of the class, he demanded—"Tell me, what is a fortification?"

"Two twenty-fortifications, six," came the answer.

The local church of Hampton Wick, England, serves boiled eggs, butter, rolls, marmalade, and tea free to all who attend Sunday morning services. The vicar originated the idea and foots the bill. 2150

Iron the Easy Way

Why You Should Have It

1. Costs only 1/2¢ an hour to use
2. Lights instantly
3. Heats in a few seconds
4. Quickly ready for use
5. Maintains even heat
6. Hottest at the point
7. Irons with less effort
8. Saves 1/2 ironing time
9. No fires to build
10. No ashes to carry

Now you can iron in any part of the house... even outdoors beneath a shade tree. The Coleman iron is self-heating. No cords nor electricity anywhere. Several models available at New Low Prices.

Ask your dealer or write us for free illustrated folder and details.

The Coleman Lamp and Stove Co., Ltd., Dept. 70317 Toronto, Ont.

Reduction In Insurance Rates

Hudson Bay Route Season Has Also Been Extended

Marine insurance rates on the Hudson Bay route have been reduced for the coming year and the season extended eight days, Railway Minister Howe announced in the House of Commons.

The season this year will last from Aug. 5 to Oct. 10 before surcharges are added to marine insurance. The season last year was from Aug. 10 to Oct. 7.

The earlier date of opening is qualified by the provision that no ship must pass Cape Chidley, inbound to Churchill, until the government ice breaker, the N. B. McLean, gives the word. Cape Chidley is at the eastern end of the strait.

The reduction in insurance rates applies only to hulls and machinery and does not apply to cargo. It is a premium charged by marine underwriters over and above the year round insurance carried by vessels. The year round rate covers them against accident on all trade routes of the world except a selected few. Before a vessel may enter these special trade routes, a premium has to be paid. The Hudson Bay route is one of these routes and the premium to be paid has now been reduced to 25 per cent.

The reduction of insurance rates amounts to 25 per cent. A vessel of 5,000 tons, valued at \$250,000 equipped with Gyro compass, will pay \$625 per round trip. The same boat in 1933 paid \$1,500; 1934, \$1,250; 1935, \$937. If not equipped with Gyro compass, the boat would have paid \$1,750 in 1933; \$1,500 in 1934; \$1,125 in 1935 and \$843 in 1936.

Reductions resulted from representations to the Imperial Shipping Commission in London.

Sound Financial Policies

Secret Of Britain's Success Opinion Of Former High Commissioner

Sound financial policies adopted three years ago are responsible for Great Britain's "muddling through" recent trade crises to world leadership in the opinion of C. Howard Ferguson, recent Canadian High Commissioner to London and former Premier of Ontario.

Mr. Ferguson, who arrived at San Francisco on the last lap of a world cruise which took him to all parts of the British Empire, declared the activity of the Mother Country was reflected in all parts of the Empire.

"There are no other countries in the world where business is as good. Great Britain leads, and Canada and South Africa run her a close second," he said.

One of the reasons for farm failures in Canada, Mr. Ferguson believes, was the cultivation of too much ground. His 35-acre farm near Ottawa had paid him a net profit of \$1,000 per year for the past 20 years.

A Knight Of St. George

Duke Of Kent Is Now Member Of The Order

Although St. George's Day received no general commemoration in London, special significance attached to the annual service of the Order of St. Michael and St. George held at St. Paul's Cathedral.

The Duke of Kent, appointed a Knight of the Grand Cross last year, wore for the first time the rich mantle of Saxon blue with the elaborate collar and chain over his naval uniform. The procession to the high altar consisted of other high officers as richly appared.

In the chapel of the order, which is part of the cathedral, the Duke of Kent's banner was ceremonially hung, and the banners of those knights who had died during the year were taken down.

That Iceland may serve as an air base for trans-Atlantic planes flying between Europe and America is foreseen by Iceland's minister of education.

Must Lower Trade Barriers

Revival Of World Trade Necessary To Halt Economic Distress

Declaring there is a "rising danger" of a catastrophic world war, U.S. Secretary Hull at Washington, attacked what he termed the "supreme folly" of "excessive" trade barriers.

A revival of world trade through a lowering of such barriers is necessary to halt the "virulent disease" of economic distress, social unrest, dictatorships and war, Hull declared in a speech prepared for delivery to the closing session of the chamber of commerce of the United States.

"Only as the world's economic health is restored will individuals and nations develop again adequate resistance to the psychological madness that makes possible internal and external strife," the secretary of state said.

Describing the new reciprocal trade policy, Hull said that if it were scrapped, the United States would take a "fatal" step backward.

SELECTED RECIPES

ICE BOX NEAPOLITAN COOKIES

1/2 cup butter
1/2 cup white sugar
1 egg yolk
3 tablespoons milk
1 1/2 cups Purity Flour
1 teaspoon baking powder
1/2 teaspoon salt
1 ounce grated chocolate
Vegetable coloring

Method: 1. Cream butter and add sugar gradually. 2. Add unbeaten egg yolk and beat mixture well. 3. Add milk, and flour sifted with baking powder and salt. 4. Divide mixture into three parts. 5. Roll out one part on slightly floured board. 6. To the second part add chocolate, melted; roll this out on top of first rolled part. 7. To the third part add a few drops of pink, green or any other vegetable coloring and roll it out on the chocolate part; roll all three together as you would a jelly roll. 8. Place in ice box over night. 9. Slice thinly and bake in moderate oven of 350 degrees for 10 minutes. (Two parts may be used instead of three, if desired.)

Weather Expert Retires

F. Napier Denison Relinquishes Post At Victoria

F. Napier Denison, who studied the earth's phenomena from Gonzales Hill observatory for 48 years, has retired from his post as superintendent of the Dominion government meteorological bureau at Victoria.

As he left his office in the dome-shaped Gonzales observatory, relinquishing his position of close to half a century to W. A. Thorn of Toronto, Mr. Denison said he was not through with scientific research.

During the years he has been in the government's meteorological service, Mr. Denison has been interested chiefly in tracing the world's earth tremors. He is known well across the Dominion and on the Pacific coast as an expert weather observer.

Another Great Ship Scrapped

French Liner Once As Famous As New Queen Mary

Less than 24 hours after the Queen Mary had made her triumphant passage down the Clyde another great ship was dragged ignominiously up the channel, stern first, to end her days in the shipbreakers' yard. She was the 42,000-ton liner l'Atlantique which was once to the French just what the Queen Mary is to the British people to-day, and which was burned in the English Channel several years ago. Over 100 men will be engaged for about a year on breaking her up.

The tusks of elephants are regular teeth and are not shed.

It's a Hit!

A joy-drive—right where it counts in smoking pleasure! Yes, sir—that's what Ogden's Fine Cut gives you every time it steps up to a light. Satisfying! Man, a homer in the ninth with the bases full has nothing on Ogden's Fine Cut. And now that times are better, Ogden's with "Chantecler" or "Vogue" papers, is the team to bank on for full enjoyment in rolling-your-own. The purple easy-opening ribbon on each package is mighty handy for removing the cellophane wrapper.

OGDEN'S FINE CUT

P.S.—Your Pipe knows Ogden's Cut Plug.

Divided By Chalk Line

Brothers Lived In Room Like Hermits For 62 Years

Death has separated two brothers, whose hermit-like existence in the hills in New York State had been divided by a chalk-line for 62 years. George Washington Coleman, 79, said he would "carry on" in the little cabin of Bakers Gulch where James Philatus Coleman, 81, died of pneumonia.

For more than half a century the two brothers had lived in the little cabin as veritable strangers, a chalk-line through the centre of their one-room marking the boundary of their individual domains.

Long School Vacations

School vacations in Spain are the longest in Europe, namely 122 days; those of Holland, Germany, Denmark and Italy the shortest, the Dutch pupils having from 43 to 51 days, the German from 31 to 45 days, the Danish and Italian, 45 days.

There are taste buds up and down the barbels, or "whiskers", of a catfish and similar buds over the larger part of its body and this fish can taste foods brought in contact with it on all sides at once.

A judge recently told a woman to speak just as if she were at home. The case is still proceeding.

Uniforms For Air Force

Are Shown In Issue Of Canadian Airway Bulletin

Foretaste of what is to come when the Canadian air mail is resumed in 1937, as current plans call for, is given in the latest issue of "The Bulletin," published by Canadian Airways, Ltd.

It shows a photograph of two officers of the company dressed in the natty blue uniforms of Canadian Airways, complete to peaked caps, with the familiar Canada Goose emblem of the company. These uniforms, it is explained, will be worn by all pilots and co-pilots on airmail runs. The first of these are worn by pilots on the Vancouver-Seattle service. The planes there have also just been fitted with complete two-way radio equipment.

Will Add To Collection

King Edward will continue and add to the famous collection of British empire stamps left by the late king, E. Goodfellow, noted British philatelist, said on his arrival at Montreal from England. He was en route to New York to judge the philatelic exhibition which was held in Grand Central Palace.

Manitoba's honey production in 1935 exceeded five million pounds. There were more than 3,300 apiarists with 51,416 hives of bees.

ABBOTSFORD

Mr. and Mrs. George Crabtree are confined to bed with influenza.

The funeral of George Dickenson, of Yale, victim in an auto accident on the Sumas highway, was held Thursday from Henderson funeral home to St. Nicholas cemetery. Rev. Mr. R. Moses, Abbotstford, officiated. The service was attended by members of the Canadian Legion.

Ralph Fountain, 1, "Tar" Wright and Gilbert Hay left this week by bicycle for the interior of B.C., where they will seek work. They intend to visit every fair-sized town in the province. This is Fountain's second venture on a bicycle, he having cycled to Ontario two years ago.

Mr. and Mrs. J. Farquhar have taken up residence on the Emerson road.

Miss Sylvia Murray has obtained a position in the C. Nelson store.

Mrs. Godson has returned from a visit on Vancouver Island.

En masse attendance is planned of St. Anne's R. C. church congregation to the special Eucharistic services in Vancouver Sunday week.

Miss Martin, from Leicester, England is guest for a short time of Mr. and Mrs. T. Bennett.

Site of the projected auditorium high school has been marked out, and foundation work is now in progress.

Mrs. Earl Jacobson is ill in the local hospital.

Exterior of the Abbotstford Theatre building has been repainted. The Atangard building exterior is also being re-trimmed.

Mrs. Ham is a patient in the M.-S.-A. hospital. She had a seizure last week, and her condition is reported to be serious. Mr. Ham is also indisposed at present, having injured his arm in a fall.

H. J. McClure of Cloverdale has taken over the butcher store in Abbotstford formerly operated by G. Gleeson.

Rev. and Mrs. E. Scratch of the Pentecostal church have been conducting special services at Ferndale, Wash., for the past two weeks.

The following officers were elected at a re-organization meeting of the St. Matthew's church Sunday School: Superintendent, Mrs. Trethewey; teachers: Miss Robertson, Mr. H. Amos, V. Amos. A garden party for children and parents is to be held at the home of Mrs. Trethewey on Saturday next, with a programme of games and badminton, and refreshments.

Commissioners Gilmere and Coult will meet this week in conjunction with Clerk Pratt, to consider the vacancy created upon the Council by the illness of Commissioner Webster, who is now in New Westminster.

Mr. and Mrs. Arthur Bradshaw and family of New Westminster visited Mr. Bradshaw's sister, Mrs. J. D. Clark on Sunday.

Library Notes

Further Adventures for the Arm-Chair Traveller

Aerial Odyssey strikes a new note with its modern method of transportation, and William Powell skips from Island to Island in the Caribbean Sea as gaily as a bee in a garden. In spite of the short time spent on his travels he seems to have acquired a really large amount of information, which he passes on—interspersed with incidents from his own adventures—in an informal way. Strangely enough, in these days of super-kodaks, there are no pictures whatever.

Excursion to Lithuania is an account of a visit to his native land by one who has been absent for twenty years. We see his village as he himself sees it, with that mixture of affection and detachment one feels for things once so familiar. And how distances have shrunk! Main street is no longer

CARMILLO LANFRANCO

Carmillo Victor Lanfranco, former resident of Kilgord, passed away in the local hospital last week at the age of 37 years. Two years ago he fell from a tree, sustaining a fractured back, which resulted in a lingering incapacitation. Surviving are his widow and one young daughter, residing on McCallum road, Abbotstford.

Deceased man is a native of Roccapietra, Italy, and had resided in this province for 10 years. As he was a War Veteran (member of the Italian forces) the Lanfranco funeral arrangements were made by the Canadian Legion. Interment was made on Saturday with Rev. R. Moses giving the service. The pall-bearers were H. Conway, J. Anderson, J. Mawson, C. Mullins, A. Webb and J. Armstrong. H. Day was Legionnaire chaplain. At the graveside "The Last Post" was sounded by M. Ralston.

"PARISH" JERSEY SHOW AT SARDIS ON JUNE 10

The Chilliwack Jersey Club's parish show and basket lunch picnic will be held at Sardis on June 10, and it is expected that cattle enthusiasts from Vancouver Island and the Lower Mainland will be present.

A parish show is something new for this part of the world. It was instituted on the Island of Jersey, first home of the cow of the same name. This type of cattle exhibit is being staged at Chilliwack with certain definite objects in mind, particularly for the benefit of small breeders of modest means. One good reason for a parish show is that answers to breeders' questions can be given with a more friendly intercourse than at a large exhibition. It is common experience to hear the question "Are these cattle going to be judged as dairy cows or show cows?" As the exhibitors and judge are warmed by a common enthusiasm for the occasion, the answer is given more intimately. This makes the show more of an educational opportunity instead of a contest for championship buyers. To assure this intimacy for the day, the committee in charge is doing everything it possibly can.

Another aspect of the advantages of the parish show is the picture it will present of the progress made by Fraser Valley sires. A class of particular interest in this connection is that for a bull and three of his progeny. All breeders interested in what his contemporary sire is doing are given a good opportunity to see. It is generally felt that for an event such as this, the good fellowship necessary to make it a success is easier to obtain on a farm than on an exhibition ground. Then, too, the agricultural division of the B.C. Electric Railway company is co-operating with the Jersey Club by adding to the attractiveness of the occasion. It is the company's intention to have demonstrations of electric silo filler, electric steam generator, and electric grain grinder.

long; the public market is no longer the largest in the world! Mr. Sacks makes his country and his people seems very real to us.

Through Forbidden Tibet takes us into a far country indeed. What various expeditions have failed to do, one young American accomplished single-handed, and the account of Mr. Norman's highly dangerous adventure makes thrilling reading. The photographic records are excellent.

Endurance is the account of the voyage to the South Pole, 1914-15, as told by the Master of the ship "Endurance." As Lord Jellicoe says in his preface, "It is a story that Shackleton's modest nature forbade his telling".

FINE CUT

WORLD HAPPENINGS BRIEFLY TOLD

The Balkan entente considered a proposal to constitute itself into a little League of Nations for south-eastern Europe.

The Soviet government announced it had accepted a British offer to begin negotiations for concluding an agreement on naval armaments.

In the last three years \$1,017,504 has been spent on Royal Canadian Mounted Police barracks and officers' residences. Hon. Ernest Lapointe, minister of justice, announced in the House of Commons.

Sir Edward Beatty, president of the Canadian Pacific Railway, has consented to open Vancouver's golden jubilee celebrations this summer. Mayor G. G. McGeer of the coast city, announces.

The post office sustains an annual loss of \$4,278,254 per annum in carrying newspapers "and other similar periodicals at a cut rate for this class of mail." Postmaster General Elliott told the House of Commons.

Newfoundland's hardy seamen came in for further praise in the British House of Commons when Winston Churchill, Conservative, urged the admiralty to hold out hope that a training cruiser would be re-established for Newfoundland.

South Africa has informed the British government that in no circumstances will it consider the question of transferring the mandated territory of southwest Africa to another power, it was learned authoritatively.

Vancouver is to have a civil bureau of identification containing citizens' photographs, signatures and index fingerprints. Superintendent H. Darling of the Vancouver police criminal investigation department announced. The scheme will be voluntary.

General Counsel Retires

Announcement Is Made Of Changes In C.P.R. Legal Staff

W. H. Curle, K.C., general counsel, Canadian Pacific Railway Company, retired under pension regulations on May 1. Sir Edward Beatty, chairman and president announced.

He is succeeded by E. P. Flintoft, K.C., present general solicitor. Geo. H. Walker, K.C., assistant general solicitor, succeeds Mr. Flintoft.

Mr. Curle studied law in Toronto in association with Sir William Ralph Meredith, former chief justice of Ontario. After completing his studies he practised law with the firm of Scott, Scott, Curle and Gleason, proceeding in 1908 to Winnipeg as assistant solicitor of the Canadian Pacific.

He was made Winnipeg solicitor in 1910, resigning to practice law in Winnipeg in 1912. He rejoined the railway company in 1917 as general solicitor in the law department, Montreal, and was appointed to the position of general counsel for the company in 1929.

Passes First Test

Stabilizing Gear On British Ship Eliminates The Roll

Life on the rolling waves may now be enjoyed—without the roll!

When the steamer Isle of Sark, first British ship to be fitted with stabilizing gear, arrived at Jersey on her first passenger test, there was not a pale passenger among the 140. Part of the secret is fins which can be put outboard in rough weather by hydraulic pumps.

According To Height

Fares in Vienna street cars are paid according to height. Whereas in most European cities ten years is the dividing line between half and full fares, there 130 centimeters, or four feet four inches, marks the half-fare limit. Standing more than that means that the passenger is grown up. In cases of dispute the conductor refers to a yard stick carved into the door frame.

Both peaks of the famous Mount Ararat are now within the boundaries of Turkey as a result of the boundary treaty signed by Turkey and Persia in 1932.

Starts Flying School

Irishman Believed To Be World's Only One-Legged Instructor

One-legged J. J. "Paddy" Flynn, black-haired, blue-eyed Irishman, has just booked his first pupils in his own flying school in Doncaster.

When Imperial Airways City of Washington crashed near Neuchatel, France, in 1930 four people were killed. "Paddy", her pilot, lived. But he fractured his spine and skull; lost one leg, broke the other in four places; smashed his ribs; spent the next two years in the hospital, had nine operations.

Now the Irish air ministry has given him special permission to give flying instruction in his own school. He believes he is the only one-legged licensed instructor in the world.

Before the City of Washington crashed, "Paddy" had carried 31,000 passengers, flown at least half a million miles. When he recovered Imperial Airways gave him a job in their accounts department.

But the little man with the cheery grin, who stumped around with a tin leg and a rubber-shod stick, could not stand that.

He had an aeroplane specially fitted for him and got back his "A" private flier's license.

He has now five "school" machines of his own.

An R.A.F. officer in the war, he fought the Richthofen squadron of "blood red" scouts. Then he went home to Ireland to fight against the English.

When the English left, "Paddy" founded the Free State air force with war-time Bristol fighters and D.H.9's to fight the Republicans. He and his men carried homemade bombs aloft in beer bottle baskets and slung them overboard.

Reduced Railway Fares

Low Excursion Rates Both East And West Are Offered

Every inducement to travel this summer in Canada's famous holiday centres both east and west is suggested in the excursion fares announced by the Canadian Passenger Association through its western secretary, Joseph B. Parker. Summer fares on the Canadian Pacific and Canadian National railways offer unusual advantages in economy on the part of the traveller and in length of time allowed on the special rail tickets provided for.

Three kinds of tickets, first class, tourist and coach classes from western Canada to points in the east will be on sale from June 1 to August 31 and will bear a final return limit of September 30. In addition to this, special fares for return limit of October 31 will be offered from May 15.

To Vancouver, Victoria and New Westminster from the prairie provinces, giving opportunity for travel through some of Canada's most romantic scenery, low summer tourist fares are to be in effect from June 1. This will bear a time limit up to September 30 and will provide a choice of travel in coach, tourist and first class accommodation. Tickets with still longer limit will be effective from May 15. Added to these will be summer fares in effect from western Canadian points to the great mountain resorts along both railways in Alberta and British Columbia.

Levels Of Conversation

Referring to levels of conversation, the Rotarian Magazine says there are three of these: "On the lowest level, one talks about things; on the middle level, about people; and on the highest level, about ideas." The Hamilton Spectator suggests that "there is a lower level than any of these, when one talks nonsense." But, says the Toronto Star, after all, there is still a lower one: when one talks only about one's self.

Paints With Right Foot

Alexander Klein, a Roumanian Jewish war veteran whose hands have been paralyzed for 17 years, has opened an exhibition in Vienna of pictures he painted with his right foot. Klein started training himself to paint with his foot shortly after he became paralyzed as a result of injuries suffered at the front.

The nerve centre of the octopus is in its eyes. For centuries, Hawaiians have killed octopuses by biting their eyes out, knowing that this causes quick death.

Farmers' Creditors' Arrangement

Stated That Reductions Effected Total Over \$15,000,000

Since the Farmers' Creditors' Arrangement Act became operative some 18 months ago a total of 11,011 settlements, involving \$51,127,476 of debt, have been effected according to the first report of the committee in charge, tabled in the House of Commons. Reductions actually effected totalled \$15,341,430, with an annual interest saving of \$1,228,718.

The report sets forth that 19,091 farmers submitted proposals, and 11,011 settlements had been made, with an average annual interest saving to individual debtors of \$151.28.

"In addition to such value as may be placed on the work accomplished, in the comparatively short period", says the report, "there is a noticeable getting-together throughout Canada of the debtors and their creditors outside the purview of this act, but attributable to the legislation, with a view to friendly adjustment of their problems by voluntary arrangement; and it is a matter of record that many thousands of such settlements are being effected without recourse to the official receivers and without cost to the government."

Settlements effected under the act, by provinces, include: Ontario, 1,261; Manitoba, 875; Saskatchewan, 1,182; Alberta, 1,041, and British Columbia, 86.

In addition to this total of 6,118, voluntary settlements accounted for 4,893 making a total of 11,011.

Indications of boards being congested is noted in the report which records that one board has had 2,967 cases before it. Of these a total of 1,261 have been arranged.

Vagrant Planets

Astronomers Are Interested In A New Discovery

Astronomers feel that now it can be told. Last February there was a whole lot of anxiety round about where the practitioners of this science gather. A Belgian member had pinned down a new minor planet. It isn't much as a planet, just pint-size really, but at that it thinks highly of itself and has started trying to keep up with Mars, Venus, Mercury and, finally, the Earth. That is how it came that in February of this year it got uncomfortably near us, well within 1,500,000 miles. With astronomers that is practically shoving.

Most of these minor planets know their place. They keep 50,000,000 miles away, and probably if they ever get a good look at us through a celestial telescope think that that is near enough.

The astronomers have got the adventuring one named, Anteros, but they aren't sure how long he will linger around in his present company. "Gravitational disturbances" is the diagnosis. This may throw the little chap into very long orbit over a long period or, perhaps, if things get too rough, eject him from the planetary system. What a planet does then is not clear. Perhaps he goes off and gets some other system which isn't so snooty to take him in.—Winnipeg Free Press.

The Vicar—"I want to speak to you, Fishner, about the milk you have been delivery lately—we don't require it for christenings."

From 65 to 70 per cent. of the world's supply of antimony comes from the Chinese province of Hunan.

Lacy Gloves Are A Joy To Crochet

PATTERN 5571

The well-gloved woman is proud to "show her hand" when gloves are as lacy and dainty as these. Crocheted so easily and quickly, you may have a different colored pair for each Summer costume. The hands are in simple mesh, the novel cuffs formed of lacy rounds, their centres pointed up by tiny Irish crochet roses. They're smart in crochet cotton!

In pattern 5571 you will find complete instructions for making the gloves shown in a small, medium and large size (all given in one pattern); illustrations of the gloves and of all stitches needed; material requirements. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

MEMBER FOR VICTORIA DIES

The first vacancy by death in Canada's House of Commons elected last October was created when D'Arcy Britton Plunkett, 64, Conservative member for Victoria, B.C., died in hospital at Ottawa after a brief illness with pneumonia and complications.

Win Challenge Cup

First Saskatchewan Mounted Rifles At Lloydminster Awarded Trophy

The Department of National Defence announced the First Saskatchewan Mounted Rifles with headquarters at Lloydminster, Sask., won the White challenge cup for 1935, with a score of 387 marks.

The cup was donated by Brig.-Gen. J. B. White for the general efficiency competition in connection with the non-permanent active militia cavalry units in Canada.

Other regiments with headquarters and marks obtained include: 14th Canadian Light Horse, Climax, Sask., 374; 16th Canadian Light Horse, Yorkton, Sask., 370; Fort Garry Horse, Winnipeg, 356; 15th Canadian Light Horse, Calgary, Alta., 344; 19th Alberta Dragoons, Edmonton, 339; Alberta Mounted Rifles, Vegreville, Alta., 339; British Columbia Dragoons, Vernon, B.C., 366; British Columbia Hussars, Kamloops, B.C., 320; South Alberta Horse, Pincher Creek, Alta., 305.

New Cancer Ray

Strengthens Hope For More Powerful Weapon Against Disease

First experiments with a new, long sought cancer ray, nearly twice as hot as X-rays to malignant growth, but comparatively cool to healthy flesh, were described in the American Society of Clinical Investigations.

The ray is a neutron beam, developed at the University of California. Its first application to cancer strengthens hopes of medical science for a more powerful weapon against cancer.

The experiments were on mice at the University of California by Dr. John Lawrence, of Yale University, and P. A. Aebersold and Dr. E. O. Lawrence, of California.

Experiments Held Up

Winnipeg's first Black Widow is dead. The deadly spider, first ever found there, died before experiments Prof. R. A. Wardle of the University of Manitoba was contemplating could get under way.

Nearly 16,000,000 people in Great Britain earn less than \$750 a year.

Celebration Was Postponed

Nizam Of Hyderabad Soon To Mark Silver Jubilee

The Nizam of Hyderabad, reputed to have \$10,000,000 as his annual personal income, \$30,000,000 worth of jewels, and a total fortune amounting to \$150,000,000, is rightly called the richest man in the world. This potentate was to have celebrated the Silver Jubilee of his ascension to the ancient throne in February, but the festivities were postponed owing to the death of King George V. When the celebration does take place it will be one of the most dazzling events in the history of the world. The jubilee procession, extending for three miles, will be the most magnificent affair in the crowded program. An army of elephants, hundred strong, decorated rainbow colors, batteries of solid silver cannon and the picturesque uniforms of the military band will add color to this pageant. The Nizam himself will ride in his state coach of pure gold from his own famous Golconda mines. Over a million pounds will be spent on this occasion. There will be free banquets for thousands of people. People will flock to Hyderabad in expectation of the great dinner. Fifty thousand sheep and 10,000 oxen will be required to feed the "guests" who are expected to be not fewer than 500,000. According to the family tradition, the Nizam must supervise personally this largest feast in the world. It will take place all over his dominions and will last a week. Where the Nizam cannot go in person his officers must act the host for him.

Musical Future For West

Sir Ernest McMillan Greatly Impressed By Growing Interest

Western Canada is on the threshold of unprecedented musical development, said Sir Ernest McMillan, principal of the Toronto Conservatory of Music, who is on an extended tour of the west.

"The growth of interest in music has nowhere been more marked in recent years than in the western provinces," said Sir Ernest. "I have been greatly impressed by the keenness of those engaged in musical activity and by their eagerness to extend their knowledge and capacities in every direction."

During his tour, Sir Ernest will visit Winnipeg, Regina, Calgary, Vancouver, Victoria, Edmonton and Saskatoon to meet music teachers and discuss with them questions of teaching, examination work and the new syllabus of the Toronto Conservatory of Music.

In each city he will visit, Sir Ernest plans to address Canadian Clubs and other organizations on music and its relation to Canadian life.

Anglican Fund Restored

Amount Originally Lost In Western Canada Has Been Made Up

Ottawa.—All the funds originally lost in western Canada in 1933 had now been restored, according to a report of the restoration fund committee to the Anglican synod of the Ottawa diocese.

The original loss of endowment funds, on which depended much missionary work in western and northern dioceses, the pensions of aged clergymen, widows and orphans, and the work of St. John's college, Winnipeg, was approximately \$760,000. When the restoration fund campaign was launched, \$300,000 was added to the sum appealed for to augment the general synod pension fund.

Does Not Like Sailing

But Queen Mary Always Visits Cowes In Yachting Week

Queen Mary has arranged to visit Cowes during the yachting week in August. She will stay in the Royal yacht with the King. For many years Cowes week provided King George and Queen Mary with their only real holiday. Yet she has never gone sailing while there, for she dislikes it. Most of her time is spent in motoring about the Isle of Wight, calling on old friends there and visiting antique shops.

Doctor: "But my dear man, I can't prescribe whisky for you unless I am sure you need it. What are your symptoms?"

Patient: "What symptoms should I have, doctor?"

Cornell University has a student from Shantung, China, named Mr. 1, his first name is Fu and his middle name Te.

The world consumed approximately 275,000 ounces of platinum metals, including palladium, in 1935.

YOUR GARDEN

Much of the real interest in gardening lies in trying something new. Of course it is not advisable to make over the whole garden each spring, nor should one abandon completely all those old favourites which have done well in the past, but without something entirely new each season interest will be lost. In a special part of every seed catalogue will be listed the very latest creations in both flowers and vegetables. Certain flowers which were always double before now appear in a single type, or perhaps a new distinct color has been added. Glants have been dwarfed, like the new tiny Zinnias, or very much increased in height, added to something which a few years ago could only be secured in midget size. Practically all the leading flowers may now be secured in both doubles and singles and some of the latter, particularly in the Asters, are very desirable.

A good seed catalogue will prove indispensable. Height of the flowers, times of blooming, whether they are suitable for such special purposes as edging, screening, cutting and fragrance, are all mentioned and are vital facts in laying out a satisfactory garden. In the vegetable line the catalogue continues this useful service by listing different varieties under the heading of early, late and medium so that a succession of vegetables is possible right through the season. With unusual sorts, special directions are given in regard to care and preparation for the table.

The following seeds may be sown early in the open: Spinach, beets, carrots, radish, lettuce, onions, parsnips and peas; seeds to be sown in the open after danger from frost is over: beans, corn, melons, cucumbers, potatoes, pumpkin and squash; seeds to be started in hot beds: cabbage, cauliflower, celery, tomatoes, peppers and egg plants. By spreading sowing of each early vegetable over a period of two to three weeks a larger harvesting season is obtained.

In selecting a list of annual flowers attention must be paid, of course, to time of blooming, color and height. But these are only elemental points. There are other and finer distinctions. Certain shades blend well together and often a whole bed will be selected with this blending in mind. Of course for this sort of thing, all the plants must bloom during the same period. Fragrance should be taken into account, as there are some spicy things like Evening Scented Stock, Nicotina, Mignonette, Sweet Sultan and Verbena, which while rather plain as plants, fill the whole garden with a delightful incense, especially in the evening. In shaded quarters, Tuberous rooted Begonias, Pansies and wild flowers will do well. In fact, they prefer this location to any other.

Urged To Store Food

If Not Needed England Can Share With Others

Grow Food, Store Food! If war comes here, the enemy airplanes will follow the lines of the rivers, pointing like arrow-heads to the heart of the great seaports. The bombers will smash the docks, blow down the bridges, and cripple our overseas food supply. If war comes elsewhere, the cost of that huge dislocation of trade in the markets of the world will drive up prices in this country to near famine level. And if this fear passes, as all good men and women pray and labor that it will, then if our land is fertile and our barns are filled we can give of our abundance, in humble thanksgiving, to those that sorely need it. Grow Food. Store Food!—London Daily Express.

Guessed Exact Time

Two Men Are Winners In Alaska Ice Break-Up

Ice started moving in the Tanana river at the exact moment E. Miller and J. Covich predicted.

The break-up began at 12:58 p.m., April 30, the time fixed by the two Juneau men, who entered the guessing contest in Alaska along with some 72,000 others. The winners are expected to split around \$72,000.

The movement was determined by a wire run from a pole frozen in the ice to a bell and clock on shore. When the ice moved, the pole broke, pulling the wire, ringing the bell and stopping the clock.

Vimy Ridge Memorial

Canada's national memorial on Vimy Ridge will cost in the neighborhood of \$1,230,000. Defence Minister Mackenzie told T. L. Church (Cons., Toronto-Broadview) in the House of Commons. This covers cost of construction, together with building of roads, the preparation and laying out of the grounds incidental to the undertaking.

Radio sets made in Palestine are provided with wood cabinets extra and specially veneered to withstand the heat and humidity.

It is to have a new fleet of steamers.

An international radio show will be held in Brussels, Belgium.

Combatting Insects Which Ultimately Would Ruin Our Agricultural Life

Canada's national collection of insects is an important factor in "Systematic Entomology." This statement may evoke the question—What is systematic entomology and what has it to do with Canada? Everybody knows that entomology is the department of science dealing with the study of insects as a whole. Fewer people may know that Economic Entomology comprises the practical work in combating insects which ultimately would ruin the economic welfare of the Dominion, and still fewer are aware that Systematic Entomology is the basis or foundation of all entomology, supplying as it does among other things the discriminations necessary upon which to combat insect havoc on food, clothing, farm crops, forests, and plants.

In Canada alone there are more than 50,000 known species of insects native to the country. Of that number, 3,000 are classified as destructive enemies. In addition to these 3,000 enemies, there are immigrants which have come to stay, such as the European corn borer, the Hessian fly, the European spruce sawfly, and the Colorado potato beetle, to name but a few. Every year the material and financial loss in Canada, as in other parts of the world, is enormous, while all the time the Entomological Branch, Dominion Department of Agriculture, is waging incessant warfare against the insect menace to reduce the economic loss to a minimum.

Systematic Entomology, in providing the material for entomological energy, embraces the classification of insects, the study of their structure, their habits and their whole life cycle, and the building up of a national collection of specimens. It is work that demands a very high standard of scientific knowledge and infinite patience, a particularly essential requisite if a scientist or research worker hopes to attain even a modicum of success. Dr. J. H. McDunnough is the chief of Systematic Entomology, and the national collection of insects in the Entomological Branch is largely the result of his efforts in the past 17 years. The collection may rightly be regarded as among the country's most valuable assets, not altogether from a monetary viewpoint, although its value in money would amount to many thousands of dollars, but as a source of scientific reference for the research worker and the more practical economic entomologist.

The entire collection totals hundreds of thousands of specimens. There are more than 3,000 drawers of pinned insect material, microscopic slide preparations of minute insects and dissections, and thousands of specimens preserved in alcohol. Each specimen is carefully tabulated and all known information about it is recorded. Day in day out, some contribution or addition is made to the collection, and some new information is compiled for the benefit of the Canadian entomological army in the field, and for other scientists.

One Of Mystery Ships

Story Of Marie Celeste Still Recalled After 64 Years

Sea-minded folk of the famed old Nova Scotia shipbuilding port of Spencer's Island have marked the seventy-fifth anniversary of the launching of one of the greatest mystery ships of all time—the Marie Celeste.

When this brigantine went down the ways there in 1861 she was christened Amazon. It was not until eleven years later, after she had been beached and damaged by a fierce gale and purchased and repaired by an American firm, that she was named Marie Celeste.

In November, 1872, she left New York for Genoa. There were thirteen persons aboard, including the captain's wife and daughter.

Several weeks later a British vessel came upon the Marie Celeste and, puzzled by her erratic sailing, discovered that there was not a soul aboard. All sail was set. Not a rope was misplaced. Meals had been left half-eaten. Sewing that the captain's wife had been doing was dropped beside her seat. Only the ship's papers and the chronometer were missing. Ashes in the galley stove still were warm.

Switzerland has more people over 60 years old living within her boundaries than any other country in the world.

Thousands Of Years Old

Chinese Emperor Had Hemp Cultivated In 2800 B.C.

Hemp flashed into the pages of history more than 5,000 years ago, and for centuries was the king of fibres. To-day, cheaper fibres are competing with hemp in the cordage factory.

Hemp sails dropped out of sight with the manufacture of cotton sails and the development of marine engines; hemp rope met a bitter rival that unseated it when mariners discovered that abaca fibre, which is called Manila "hemp", was cheaper, would float, and did not require the application of tar; hemp cotton-bale wrapping bowed to Indian jute and waste cotton; and 20 years ago carpet manufacturers substituted cotton and jute warping for hemp.

Hemp is a cousin of the mulberry tree and a native of Asia. Since 2800 B.C., when a Chinese Emperor taught his subjects to cultivate hemp and to make hemp cloth for clothing, hemp has frequently appeared in historic records. The Chinese also ate the seeds and extracted an oil from the plant.

Hemp followed civilization westward. Before the Christian era the Indians, Arabians and Persians were cultivating hemp for drugs, which they learned to extract from the plant. The Scythians took hemp with them to Europe 3,500 years ago. Hemp's drugs attracted North Africans to the plant and the strength of its fibre—hemp is the strongest of all fibres—brought it into wide use on the sailing vessels of the Mediterranean.

Hemp invaded the Western Hemisphere in 1545 when some seeds from Spain reached Chile. North America began to cultivate hemp shortly after the Puritans settled in Massachusetts, but the southern colonies were more successful with their plantations. Laws promoting the hemp industry were passed by the early legislatures of colonial Virginia. Lancaster, Pennsylvania, was the centre of a large hemp-producing region during the Revolution.

Vanish From Circulation

Silver Dollars Bearing Portrait Of King George Are Scarce

First supplies of 1936 Canadian silver dollars which recently reached Edmonton banks have been absorbed by collectors, officials report. Like the Silver Jubilee dollar of last year, it is believed the new money will be kept as souvenirs and very little will be in circulation.

The new money is being sought by collectors in the belief it will be the last issue bearing the portrait of King George V. The 1937 issue is expected to mark King Edward VIII's coronation.

The 1936 coin bears a new portrait of the late king, and was designed just prior to his death.

Chronic Drinkers

Says Alcohol Is Unreported Cause Of Many Deaths

Alcohol was given as an unseen and unreported cause of many deaths among chronic drinkers, in a study reported to the American Psychiatric Association by V. G. Urse, M.D., assistant psychiatrist of the Cook County psychopathic hospital, Chicago.

Of 21 deaths which he found due to alcohol he said the coroner attributed only five to that cause, missing 78 per cent. They were missed, Dr. Urse said, because presumably fatal alcohol may fail to leave clear traces. He suggested need for re-examination of the true role of chronic alcoholism.

Canada's Silk Industry

For eighteen years the silk industry of Canada has shown almost unbroken progress. It passed through the worldwide trade recession with a record of increased production every year. A small industry at the close of the war, to-day it is one of the five largest branches of the textile group in Canada.

Name Means Nothing

What's in a name? In California there are 140,000 acres of English walnuts planted and in Africa nearly 1,000,000 pounds of Turkish tobacco will be raised this year. And Elgin County, Ontario, raises Virginia tobacco.

China has just adopted flat air mail rates.

Butler (to professor): "Excuse me, sir, but the telephone is over here!" —Lustige Blatter, Berlin.

Have Difficult Job

Business Men Put In Good Word For Politicians

The following article is by J. M. Macdonald, a business man, in Canadian Business, Montreal:

"We are apt from time to time to speak impatiently about politicians and we sometimes rather fancy that we are better men than they are. Business men, however, have not been prepared to take as much trouble as politicians to do something for themselves in the public service. Politicians have a much more difficult job than business men. Public men have got a lot of fellows on the watch, every time they make a wrong decision, to put it in the front pages of the newspapers. It is not an easy job and if we want to get things done by public men we should remember their difficulties and that they are just as anxious to get the right thing done as we are. . . . Business men are apt to be critically minded towards what we call the academic frame of mind, and they are apt to be just as critical of business. It is highly undesirable that that state of affairs should go on. I am sure they need us and I am equally sure we need them, and we should be prepared to believe that there is a great deal for us to learn from them and hope that they might find out also that there is something to learn from us. A necessary condition for co-operating with university men is to give them the same line of freedom in their business that we want to have in ours."

Restricted As Health Measure

Budget Controls Import Of Used Magazines For Resale

Importation to Canada of waste material used in the manufacture of mattresses and of used magazines will be restricted as a health measure under budget provisions disclosed by Finance Minister Dunning.

It has been the custom to bring in from the United States mattress waste used in manufacture of new mattresses. Now this material may not be imported unless accompanied by a certificate of fumigation and cleaning.

Used magazines and periodicals may be brought in as gifts or as waste material, but not for resale as magazines.

Life insurance written and paid for in cash in Canada during 1935 amounted to \$588,348,611.

Need Wider Markets

Says Economic Relations Of The World Due For A Re-Orienting

Long agony of low prices and closed markets should come to an end, stated R. C. Matthews, president of the Canadian Chamber of Commerce, at a meeting in Washington.

The minister of national revenue in the Bennett administration stated that in economic relations the world was due for a re-orientation. Nations must learn afresh to seek business, to find markets and to admit the products of other countries.

Debtor countries must have the opportunity to sell to their creditors, he said, if they were to be able to discharge the interest on their funded obligations and creditor nations must learn to recognize that fact.

It was true, and should be admitted, that some countries felt compelled by economic conditions to resort to greater measures of protection to provide against undue internal economic disturbances by the dumping of foreign goods upon their markets.

"If, however, these countries are to progress, an expansion of their foreign trade, both export and import is essential," he added.

Trans-Canada Highway

No Expectations Now Of Completing The Road This Year

A passable trans-Canada highway could be completed by the fall of 1938 at a cost of approximately \$10,000,000 to the federal government, Labor Minister Rogers told the House of Commons.

The house approved a vote of \$3,527,125 for trans-Canada highway work in the present year. There is no thought of completing the road this year.

According to an engineer's report, said the minister, completing the Ontario section of the highway on a 50-50 basis with the provincial government would cost the Dominion \$8,390,650.

Situation Was Different

"Pat", said the Judge, "if you had two million dollars, would you give away half?"

"I would that."

"If you had ten horses, would you give away five of them?"

"Sure I would."

"If you had two goats, would you give away one of them?"

"I would not—I have two goats."

Proud Peacocks in Simple Stitch

Household Arts by Alice Brooks

Easy to Give Your Linens Regal Beauty

PATTERN 5587

Want a charming bit of Summer itself for your own home sweet, home? Then embroider a proud peacock on a chair-back cover, a dainty floral motif on your best pillow-top, and you're all set. It's cross stitch, that is easy to do, and permits you to be just as gay in your choice of colored floss as you please!

In pattern 5587 you will find a transfer pattern of two motifs 10½ x 13½ inches and two and two reverse motifs 2½ x 5½ inches; material requirements; color suggestions; illustrations of all stitches needed.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Reorganization Of Water Development Work Under Farm Rehabilitation Act

Son Of Scottish Manse

Lord Tweedsmuir Proud Of Being Elder In Church

The other day an Ottawa news despatch informed us that the Governor-General of Canada went down to Knox Church and spoke at the annual meeting of the Ontario Provincial Women's Missionary Society of the Presbyterian Church in Canada. In opening his remarks he said, "As an elder of the Church of Scotland and a son of a Scottish manse, I am glad to be among my fellow Presbyterians." In commenting upon these words the Ottawa Journal expresses hope that they will be read by some young Canadians and by other Canadians with whom it is the fashion these days to adopt a patronizing attitude towards church members and religious workers. "John Buchan, novelist, author, historian, scholar, standing in Knox Presbyterian Church, professing his faith openly and his pride in being an elder, should be a corrective of such thought. It should tell some few of us at least how superficial such thought is, how compounded of pride and ignorance and things equally unlovely. Tell that there is no conflict between scholarship and the highest standards of success and the practical or even humble work of religion." The truth is that the best features of civilization are based upon the Christian religion. Those who neglect this paramount truth have either not read history with any understanding or they are deliberately "kicking against the pricks," to use a phrase employed nearly nineteen hundred years ago by one of the apostles.—Toronto Mail and Empire.

Wireless Messages

King Edward Prefers To Use The Word "Radio"

From Time comes an interesting sidelight on the independence of thought and action which the British people have learned to recognize as characteristic of King Edward.

In preparing a speech His Majesty, it appears, himself types the first draft of his address:

He then hands this typescript to his advisers, who make suggestions by striking out or inserting between his double-spaced lines. Thus the word "radio" typed by His Majesty in composing his first broadcast was struck out and in was written "wireless." This suggestion His Majesty overruled—and back the word went to "radio."

The significance of this may be lost to many Canadians not conversant with the fact that where we use the word "radio", the people of the Old Country are wedded to the term "wireless."

But now that King Edward has introduced "radio" into his vocabulary, it doubtless will become common usage in the British Isles. It certainly has become, says one witty commentator, "King's English."—Halifax Herald.

Setting Thames On Fire

Old Phrase Has Nothing To Do With River Thames

The Port of London Authority Magazine for April sets out to destroy the common acceptance of the phrase "setting the Thames on fire." It suggests that this, in origin, has nothing whatever to do with the River Thames.

The explanation given is that a "temse" was a horse-hair corn sieve used for sifting grain after it had been ground. Hard workers would sieve vigorously, sometimes even causing the horsehair to smoulder from friction; lazy workers would never set the "temse on fire."

The explanation is interesting, but the well-worn phrase will stick, as it is much more graphic.—Montreal Star.

Clock And Calendar

A machine which combines a clock and a calendar has been perfected by A. Germandson, a Swedish inventor. Both are driven automatically, and the calendarium adjusts itself to the varying lengths of the months, even as to observing the leap years.

Beethoven, owing to deafness, never heard a single note of his greatest work, the Ninth Symphony.

The output of coal from Saskatchewan mines during 1935 amounted to 919,477 tons valued at \$1,281,005.

Important changes in policy, approved by the Dominion Minister of Agriculture, Hon. J. G. Gardiner, respecting the water conservation work organized last year under the Dominion Prairie Farm Rehabilitation Act have just been announced by J. Vallance, senior rehabilitation officer, whose headquarters are in Regina, Sask. The announcement, including a revised basis for engineering and financial assistance for the building of stockwatering dams and small irrigation works, outlines a reorganized setup providing for the establishment of provincial committees for Alberta, Saskatchewan, and Manitoba in place of the Water Development Committee formerly under L. B. Thomson, Superintendent of the Dominion Experimental Station, Swift Current, Sask., and for the transfer of all engineering work in connection with the smaller projects directly to the provinces but financed under the Dominion Act and supervised by the Dominion Department of Agriculture.

This change makes all engineering work in connection with small projects, including stockwatering dams and private irrigation schemes, a direct responsibility of the provincial officers entrusted with the administration of water rights. Previously this phase of the work was directly under the committee.

The engineering staff required for the investigation, survey and construction of community projects, for which tenders are let, is not being decentralized but will continue as part of the central organization at Regina.

Community projects now under construction or for which contracts have been authorized include the Val Marie irrigation project, the Eastend irrigation project, Middle Creek and Adams Lake storage dams, and the Wascana reclamation project, all in Saskatchewan. Community works under construction in Alberta include the Wild Horse storage dam and certain repair work in connection with the Canada Land and Irrigation Company near Vauxhall. No new community projects are under construction in Manitoba though some six community dams were built in that province last year, including a dam near Souris, one at Crystal City and four in the municipality of Edward.

New community projects under investigation include the Estevan flood irrigation scheme involving about 3500 acres, the community dam on Wood River near Coderre, Saskatchewan, and a number of community projects in Alberta, including the Leavitt irrigation scheme, Pot Hole Creek project, Berry Creek, and the Milk River diversion near Warner.

The personnel of the water development committees for each of the three provinces includes: J. Vallance, chairman; B. Russell, senior engineer; W. L. Jacobson, secretary; and the provincial officer charged with the responsibility of water rights administration within the province, namely L. C. Charlesworth in Alberta, C. J. McGavin in Saskatchewan, and C. H. Attwood in Manitoba. The main function of the provincial committees will be to consider applications received and to assist in co-ordinating the work between the Dominion and Provincial officers.

A staff of agricultural representatives will be attached to the central office for the Dominion Department of Agriculture in Regina for the purpose of investigating the agricultural features of applications submitted and these representatives are to work in close co-operation with the district engineers of the provinces.

War Against Crows

Open to all residents of Saskatchewan, the campaign to effect the extinction of crows and magpies, sponsored by the provincial department of Natural Resources, commenced on May 1. Certain crows and magpies have been caught, banded and freed in various sections of Saskatchewan. Numbers have been selected and cash awards of \$1 to \$500 will be paid the persons who deliver to Game Commissioner, Regina, the bands bearing the lucky numbers. Rules and information concerning the campaign may be had from the Department of Natural Resources.

Canada's export of nickel in February had a value of \$4,120,000 compared with \$2,705,000 in February last year.

Summer brings forth once again
the perennial crop of "knights of the
road" inflicting upon residents their
hard-luck stories and requests for
handouts. Every day a few of these
appear in Abbotsford.

AMELIA FOOKS

Death, which came quietly in her
sleep last Tuesday evening, brought to
a close the eventful life of Mrs.
Amelia Fooks, an esteemed pioneer
of the district. Mrs. Fooks was in
her 85th year, and a native of Bristol,
England.

Accompanying her husband, Mrs.
Fooks came to Canada at the age of
21 years. The young couple spent
some time at Ottawa, at that time
nothing resembling the present modern
city, and in 1886 they proceeded
west to British Columbia.

Forty-seven years ago, Mr. and Mrs.
Fooks and their family arrived at
Kilgord. The journey was made from
New Westminster up the Fraser
river to Mission on a scow towed by
a tugboat. Endeavoring to convey
their effects by scow from Mission to
Kilgord, they ran onto a sandbar in
Sumas lake, and after two days' hard
work, the scow was pulled by hand to
Kennedy ridge and unloaded there.

Sumas Sparsely Settled
Only two or three other pioneer
white families were settled on Sumas
when the Fooks' arrived, and the Kil-
gord Indian village, a large one in
those days, was under Chief Ned. Sumas
City, Wash., just across the border,
was showing promise of becoming
a logging centre, Bellingham (or
Whatcom) as the Bay City was then
called) was no larger than Sumas. Ab-
botsford comprised one store, Mt. Leh-
man and Riverside (south end of Mis-
sion bridge) were the only villages.
Supplies for settlers were brought by
boat from New Westminster, and to
connect with this source, Upper Sumas
settlers would canoe across Sumas
lake, and catch the boat plying from
Nicomen to Mission. Mrs. Fooks
and her late husband would frequently
recall those early days, which, in
spite of many hardships and diffi-
culties, were happy ones to those en-
gaged in carving out homes in the
then unsettled district.

Mr. and Mrs. Fooks lived at Kilgord
until fifteen years ago, when they took
up residence on the McKenzie road,
Abbotsford.

Mrs. Fooks, a staunch member of
the Anglican faith, was among those
instrumental in establishing St. Mat-
thew's church here.

Surviving are one son, William, at
Clayburn and a daughter, Mrs. Wil-
liam Holmes of Ladner; also four
grandchildren and two great-grand-
children.

The funeral, which was largely at-
tended, was held on Saturday from
St. Matthew's church to Hazelwood
cemetery. Rev. Mr. Cockburn officiat-
ing. The pall-bearers were, A. Camp-
bell, D. C. Durrant, H. Fooks, J. Gam-
bel, Locke Holmes and R. Fooks.

"RELIEF" IN U.S.

Care of unemployed men and women
is almost as heavy a burden upon
ratepayers in U.S. as in Canada. But
where the value for such doles in this
province is measured principally in
road work of uncertain value, an ef-
fort is made in the country to the
south to obtain something of market-
able value for the expenditures.

Writing to The News, a visitor in
one of the "Federal Projects" in a
large southern California city com-
ments thus:

"After climbing two flights of stairs
we entered a large room about 100 by
300 feet long, unusually well ventila-
ted by large dormer windows that
swung outward. There were also ven-
tilator shafts in the ceiling, and three
adequate fire escapes. The room was
well lighted.

After being greeted by the lady in
charge, we turned our attention to the
workers—besides about a dozen time-
keepers, stenographers, etc. there were
about 400 women in this project; there
were about 150 machine sewers, electric
and power, the rest of the women
were doing hand-sewing, inspecting
folding and tagging the finished
articles, which were returned to the
stock room carefully labelled for ship-
ment to the Federal warehouse.

As we walked around the tables ac-
companied by the forewoman, who ex-
plained the modus operandi, we care-
fully studied the women who were doing
the work—all kinds, conditions
and ages were represented. On the
faces of the older women I noted pa-
tience, pathos and privation. Most of
them had from one to five depend-
ents, and in many cases there was
serious illness in the family, but they
seemed hopeful and very thankful for
the opportunity to earn their living
rather than be "on relief" and I wanted
to put out arms around them all
and whisper words of sympathy and
encouragement. With the younger
women there was hopefulness and an
eagerness to face the future confi-
dently. Privation and worry had not
yet left its mark upon them.

As I passed among them during re-
cess, in which they are allowed five
minutes every hour, I heard snatches
of conversation...one girl was atten-

FARM EXPORTS INCREASING

During the past week dozens of
trucks, loaded with Fraser Valley po-
tatoes, have crossed the border at
Huntingdon to load on trains for the
Seattle market. The shipments are
arranged by B.C. Coast Vegetable Mar-
keting Board, and the total passing
through the local port aggregates
over 20 carloads of 20 tons each.

Potatoes reached a "high" of \$4.50
per 100 pounds for Yakimas in Oregon
and Washington last week, with an
average price of \$3.50 for lowlands.
Canadian potatoes face a duty of \$15
per ton entering U.S., as do American
potatoes entering Canada. "All our
export to Washington is No. 2," state
A. H. Peterson, secretary of the Board
"competing against a similar grade
which sells at \$3 per 100 lbs. in Seat-
tle, instead of \$5, as many growers be-
lieve."

More than 1300 head of beef cat-
tle went through the local port with-
in the past week, destined to Seattle
abattoirs, and 80 head of pure-bred
sheep for sale to Southern California
breeders.

ding night school five nights a week,
preparing herself to take the State
examination for stenographer; another
was studying accountancy, and all of
the younger ones were preparing
themselves for future work. Many
were eager to learn to sew on the
power machines, fine hand sewing,
millinery, forewoman, etc., and this
is just the object the government has
in mind—to teach these women trades
so that they can be self-supporting.
They are given an opportunity to get
experience in every department. At
every table there is a monitor or un-
der-forewoman; all work is rotated,
so all have an equal chance.

All kinds of garments are being
made: men's khaki pants, work and
dress shirts, shorts, union suits and
women's and children's garments, lay-
ettes, pajamas and so on. There is no
waste, as the scraps are made into
quilts and rugs, and the finished gar-
ments are better made than the ordi-
nary factory garment. The women

*To avoid
disappointment
on your
vacation*

Holidays are sometimes spoil-
ed when people take along
things they don't need and leave
behind things they do need.

If you're going away, there are
many things you'll want to find
out in advance—what to take,
where you're going to stay, etc.
A quick and effective way of get-
ting this information is by long-
distance telephone.

A long-distance telephone call in
advance may prevent disappoint-
ment later.

Don't Guess But Know

Whether the "Pain" Remedy You Use is SAFE?

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN."

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach and, often, for the heart. Which is food for thought if you seek quick, safe relief.

Scientists rate "Aspirin" among the fastest methods yet discovered for the relief of headaches and the pains of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

FLEMING'S FOLLY

— BY — LAWRENCE A. KEATING

SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilgo stay behind and Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence his sister and, as he asserts, ruin his "spread". Buzz shoots at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is uninjured. Buzz is arrested and sentenced to three years' imprisonment.

Helen and Fleming form a partnership to provide irrigation for their own properties.

Fleming goes home and studies the plans drawn by Torney to learn whether they could be adapted to a smaller scheme suitable for his and Helen's land, and is satisfied it could be done. Feeling cold, he lights the fire and there is an explosion that wrecks the house, burns it and the plans and renders Link unconscious. He is rescued from the blaze by an employee.

Buzz Hamilton arrives back in Rawhide while Fleming and Helen are in the bank getting a loan for payment of wages for work on the dam. Roper Kilgo and Jackpot Mell meet him and he goes into the saloon with them. By the time his sister and Link come from the bank, Buzz has had several drinks. Roper has distorted the facts concerning the dam proposal to Buzz, making it appear that Link was trying to ruin him. Buzz, inflamed with liquor and anger, tries to throttle Fleming, but is thrown to the floor. Then Helen appears and tells Fleming she has been robbed of the \$800 they had obtained from the bank.

On their arrival home they were met by a couple of Link's workmen, who told Fleming that there was a strike at the dam, and that the men were afraid they would not get their wages. Link told them of the robbery and promised them their money as soon as possible. The men reluctantly returned to work.

Fleming finds Roper and Jackpot Mell making trouble among his workmen, and orders them off his place at the point of his gun. Both Jackpot and Roper swear revenge, Mell telling Fleming to carry his gun with him, as Mell would shoot him the next time they met.

(Now Go On With The Story)

CHAPTER XIII.—Continued

"Kilgo talked you into this trick. I know his brand," Fleming continued with bitterness. "He swung you against me before you'd been in the

county five minutes. It gnaws at him because he lost to me the land I'm going to irrigate, playin' poker. And he needs range or his stock'll starve. He's plumb jealous. Can't you see it, Buzz?"

The visitor's facial muscles worked. "I can see Kilgo's a whole lot more friend o' mine than you are! Then yuh won't advise Helen to give me the responsibility of running the spread?"

"Yes. But by no means that power of attorney. You haven't earned it."

Buzz stood eyeing him, panting hard. Plain in his nasty scowl was the desire to spring upon Link. But he was unarmed—a condition of his parole—or certainly he would have whipped out a gun. His lack-lustre eyes blazed bitter, unyielding hate.

"I'm entitled to my share of the ranch, and if you don't help me get it, I'll find another way. I wish to heaven," the youth burst out suddenly, "yuh hadn't had me paroled! Roper would've got me a whole pardon so I could have my rights!"

"He lied to you. Kilgo never thought of it, and anyhow he hasn't got the reputation to have it put through. Look here, Buzz," Link added, forcing a conciliatory tone, "let's cut this out. Tell Helen I'm in favor of making you foreman or manager. Say, down in your heart, you believe in the dam. Don't you, now?"

The look he received was one of supreme contempt. "I'm not so blind but what I can see yuh skin-nin' us of our property. Like that eight hundred bucks yuh fixed to rob her—"

"Hold on!" Buzz shrank back as if he feared a blow. "You know I had nothing to do with that!" Fleming roared, his pride stabbed to the quick. "Are you trying to make out I hired someone to pull that job? There isn't a scrap of evidence of it, Buzz Hamilton!"

Now the visitor was the more self-possessed of the two. His upper lip curled back in a sneer. "There's isn't, eh? Well, yuh can buffalo Sheriff Stephen but not Sis and me! That leather cuff Helen grabbed for a clue comes from Buster Townsend, your foreman. The guy you switched to bossin' the dam under McLendon. Now will yuh still claim yuh didn't hire Townsend to pull the holdup?"

Fleming leaned weakly against the corral rails, his incredulous stare fastened on Buzz. "Townsend? You mean Buster? Why, gosh, there must be some mistake. My own foreman wouldn't—"

"It's hard to crawl out of, eh, Fleming?" The rancher jerked bolt upright. "Let me tell you, Buzz, if Townsend owns those cuffs, and he held up Helen for that eight hundred, he'll pay! I'll wring it out uv him good and plenty. And if he's guilty Buster will be in the jug before night, and I'll send him up for as long as the law allows!"

Hamilton stared down at his boot-tips, then flashed a skeptical look. "We're waitin' to see if yuh act as big as yuh talk. I found out yesterday that Townsend owns the cuffs. Another thing: when Mell kills yuh, how about our spread? It'll bankrupt us, I suppose. Or else yore heir, whoever that is, will own it. But damn you, Fleming," he cried, "I'll prevent that if I choke in the attempt!"

He started off but Link, after brief hesitation, spoke up. "Hold on, Buzz, let's not wind up in a quarrel. Listen: Helen and I signed an agreement. You don't have to worry about your spread—it's all down in black and white about our partnership."

"Agreement? What's it say?"

"If one of us should die before this job is finished, the other inherits his share of the dam and all the land irrigated. That's because we're set on putting this thing over, so the one that stays alive won't go broke. It lasts ten days after the dam is completed."

There was a long silence. Scrutinizing Hamilton's ashen face, Link was scarcely aware that Buzz moved closer, met his eyes for the first time, and bored him with an amazed, hateful look.

"If one of yuh dies—the other gets his property? Why is that?"

"Just to protect us both. It's ordinary business. You see, we figured—"

Like a bolt from the blue the paroled man shot long fingers for Link's holster. Out streaked the blue-black Colt, its muzzle whipping up as Buzz sprang away. "Yuh snake!" he screamed in the frenzied tones of a man temporarily deranged. "That's how yuh planned to grab our ranch—by that agreement. Do away with my sister, eh? Fleming, that's gonna give us yore ranch. Now!"

Link ducked. The weapon roared and a bullet whizzed over his head. He plunged forward his hundred and eighty pounds of work-hardened

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. Little do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else, etc.

muscle. Again the forty-five vomited flame, and its slug carried the rancher's sombrero between rails and into the corral. A neat furrow plowed in Link's shock of hazel hair with the next roar of the sixgun. Heat stung his forehead.

Their bodies collided. They sank in a writhing, grunting heap. Buzz, more agile than his appearance suggested, squirmed to free his right arm. The gun swept up. Link's left fist lashed out and knocked it spinning away.

Quickly he clambered to his feet. Buzz followed, and uttering a weird, maddened cry, charged, his long fingers clawing, a wild look on his face, his eyes bulging with hate.

There was nothing else to do, no other way out. Fleming crooked his sinewy arm, then snapped it forward.

Cr-rack! Knuckles struck chin. The sound carried sharply through the quiet sunlight and Buzz's head flared back as his teeth clicked. His expression went suddenly blank. Rocking on his heels an instant, he collapsed in a limp heap on the ground.

An instant Link stared regretfully down at his victim. With a low growl he strode to the board trough 30 feet away, dipped a bucketful of water, and carried it back. He dumped a generous quantity over Hamilton's face and head, straightened, hurled the bucket aside, scooped up his gun, and holstered it. He was trembling. His brain seemed foggy as he walked off.

Reaching the ranch house, he looked back. Buzz was groping at a stirrup to mount. He rode away, swaying weakly. Link watched him during a mile's progress, then stiffened as he saw another rider appear and greet Buzz. Fleming muttered a dry curse.

It was Roper Kilgo.

CHAPTER XIV.

For twenty minutes Fleming paced restlessly up and down the low-roofed stoop of his ranch house, head lowered as he scowled at the floor, hands clenched behind his back or hooked in his cartridge belt. Matters were in a jumble, and there was need of action to straighten them out. Making up his mind, the Star Loop owner went to the corral. Better, he thought, to face Helen Hamilton now than to wait until Buzz could give a distorted story of what had transpired.

He had one foot in a stirrup when across the silent prairie there came a dull roar. For a few seconds it heightened, then subsided—and swelled again. Almost like a series of muffled explosions, it was not exactly definable for its faintness.

But one thing Link knew, that it came from the dam. An instant longer he listened intently, then sprang astride his mount and with spurs rowelling the beast's belly, thundered over the heat-shimmering prairie toward the foothills. On he raced as fast as his wiry mustang could carry him, until horse and rider were dodging amongst boulders and scrub pines at the foot of the incline to the irrigation workings.

Suddenly a shot rang out. A bullet whined through the air, and another gun barked, its slug snapping taut his grey shirt as it billowed behind him.

He checked his horse, and forty-five in hand, sent startled looks behind as he flung from the saddle. Ping-g! Two more bullets came as before from widely different sources, one on each side of him and behind, indicating that the gunners were in no danger from each other.

Realizing that the next shot might drop him, Fleming ran at a crouch for the nearest protection, a red boulder. He paused for a careful survey then described a cautious arc toward the foe he deemed closest. A slug whizzed overhead, and a sharp staccato crack from the fellow's accomplice flung's Link's sombrero, recovered from the corral where Buzz's bullet had sent it, sailing away with a second hole through its crown.

He clenched his trigger twice. One bit of lead glanced off a boulder. The other buried itself close behind a man just scrambling into a patch of bushes. Before Link could reach the spot, he heard the clomp-clomp of hoofs

from two sources. The Star Loop owner dashed to the fringe of trees in time to see a pair of horsemen streak away, heads lowered, spurs scratching, as they pressed their mounts faster.

Already they were poor revolver targets. Staring at the figures, one blue-shirted, the other wearing a dark cloth vest, Link uttered a surprised whistle. When they were quite gone he strode grimly back to his own home, caught the animal's reins, and mounted.

The lurking assassins were Buzz and Kilgo!

Their purpose in trying to kill him was evident—Buzz wanted the Star Loop to become part of the Triple H according to the agreement, between Link and Helen. The treacherous Roper egged him on, planning to have his own time to work on Buzz with some wily scheme to wrest away both ranches, plus Star Creek Dam!

Arriving at the place to leave his horse, he dismounted and ran quickly up-trail, emerging at the headquarters to find no one about. But cries and exclamations caused him to hurry down the ladder to the muddy creek bed, thence upstream from the dam. On reaching the temporary cut-off he was greeted by a scene of utter confusion.

McLendon, the 30-year-old engineer, was on his knees beside a man lying prone. A dozen workmen huddled about another still form, and two or three, noticing Link, assumed resentful, accusing looks.

"Mac," the youth panted, "what the devil happened?"

"Landslide. Somebody started a boulder right down on the men. By God," snapped the other between grim-set teeth, "if I get the fellow, he'll burn!"

Buster Townsend hurried up, his face streaked with dust, his runtish figure trembling with excitement. "He—he got away!" Buster came nearer. "We were workin' at the cut-off," he exclaimed, waving his thick hands, "and all of a sudden somebody yelled 'Look out!' We heard a roar, and holy smoke!—half the mountain comes down on us!"

"Where were you?"

"Huh? Why, right over there!" The man pointed, and strode a few steps to show his chief. A ragged mass of earth and debris and a gap above was mute explanation. Fleming needed no one to tell him that the landslide was mercenary work.

Else why hadn't earth caved in away from as well as toward the pit, going also into the diverted stream? It had been arranged to come toward the dam, where posts and boards were built into a barricade against just such an accident, where at one spot pine tree trunks and boards had been ripped away.

Link turned and called his engineer. The man rose from the victim and hurried forward. His face was pale and serious. He shook his head.

"Where were you, Mac?"

"There." He indicated a spot under the rising wall of concrete.

"You, Buster?"

"Why, I told yuh I was right here! Happened I'd started back to McLendon. The boys were workin' all around. I was goin' to ask Mac if I should plant dynamite, gettin' ready to blast the cut-off when he was ready to turn the river loose against the dam."

Fleming rolled a cigarette, eyeing him sharply. "You mean you were ready to do that? How about it?" he demanded of the engineer.

McLendon, a thin, serious-looking chap, shook his head. "Buster was too previous. We can't possibly be ready till tomorrow, and now with this mess to clear away, maybe not then. I found a place at the foot of the dike where we got to pour concrete reinforcement. The sluice gate stanchions have got to set more. And they've got to be tested after that. We're a long way from being done, Link, although I suppose to Townsend here, and others who don't know exactly how these things are, it looks almost ready to use. But there are still a lot of small jobs ahead of us. The men are dissatisfied and grumbling," he added in a lower tone. "They don't work very fast."

The rancher nodded and hurried back to the victims. One he recognized as Tug Orless, who had greeted him with threat of a strike when he and Helen and Buzz returned from Rawhide after Buzz's homecoming. Link knelt beside the man who was groaning in pain.

"What's the matter here?" he asked with attempted cheerfulness.

A workman attending Orless gestured to his legs. "Smashed. Both feet got crushed, and he's shore bruised up, Boss."

Tug opened his eyes, racked with pain, and recognized Link.

"Darn yuh!" he snarled hatefully. "Gettin' men to work for yuh never

knowin' if they'll get paid. Now what, eh? Laid up—maybe for life." He cursed violently. "Helluva lot yuh care! Yore dam—that's all yore thinkin' of!"

"Hold on, Tug. Have a smoke?" Fleming extended makin's to the victim. "Don't worry, Tug," he went on calmly. "You're goin' to get paid for every day you're laid up, just as if you were working. I'll stand the doctor bill."

Orless left off building his smoke. His eyes widened. "Yuh mean that, Fleming? Gosh, I got an old woman in Rawhide, an' there's going to be three of us in not so long. Yuh mean that?" he repeated earnestly.

"Of course I mean it, Tug. You're coming to the spread to rest up till you're in condition to go on home. Buster!" he called. "Did you send for a doctor?"

The foreman started. "Gosh, no! I—"

Link leaped to his feet. Something about his attitude aroused suspicion, and remembering what Buzz Hamilton had said about Buster's leather cuffs, Fleming bored his employee with keen disapproval. But he checked the speech that rose to his lips and strode to the other hurt man.

"Mac, send a rider for Doc Slater pronto. Have 'im tell Doc to rush to my ranch house. Get a wagon or somethin' to move these men. Start them right away. Hmm," he murmured, kneeling beside the second victim. "You're bandaged up some, eh, Jimmie?"

(To Be Continued)

Inventors Create Work

Manufacturers Can Always Use Ideas That Are Feasible

Inventors, said Albert G. Burns, eyeing a mouse electrocution trap, are the ones who will pull America out of the dumps.

Burns spoke as president of the National Inventors' Congress, sponsors of an exhibition at New Orleans.

Latest major developments affecting the welfare and future of the nation, Burns said, are, in order:

Air conditioning—not simply air cooling—a new interpretation of housing and living; television, rather than radio, for a new world-wide communication system; aviation improvements, such as a new all-metal subatmosphere dirigible.

Vast social and economic changes are due to follow recent mechanical achievements, Burns said.

"No invention—a basic idea—ever threw men out of work," he said. "Real inventions always create work. True enough, some stage coach drivers who couldn't learn to be brakemen lost their jobs, and some blacksmiths who didn't go into tire repair work lost out when the automobile came along. But look how many millions of jobs the railroad and automobile created."

There are some 22,000 busy inventors in America, Burns revealed.

Had The Last Word

Attorney Did Not Get Ahead Of Florist's Clerk

E. O. Jones, La Plata lawyer, recently stopped in a Jefferson City flower shop while en route home from Rolla, where he is a special attorney for the United States Department of Justice. He ordered flowers for his wife. A young woman prepared the bouquet. Jones requested that she put ice around the stems to keep them fresh until he reached La Plata.

The girl argued that ice would not be needed for such a short trip. The attorney rebuked her: "You're paid to give service here, aren't you? I want ice on those flower stems—so please put ice on them." He intended his sharp remarks as a joke. Apparently the girl took him seriously. She followed his directions without further comment, but as she handed the package to the purchaser she archly achieved the last word:

"It's easy to see why you have to take flowers when you go home."

A Famous Bus

"Old Bill," one of the two survivors of early war days when a string of London omnibuses were sent to France to equip British troops to the battle front, has arrived at the Pacific coast aboard the M.S. Pacific Enterprise. The famous old bus, which is being preserved as a battle relic, is on loan to the Vancouver jubilee committee.

Policeman (to motorist): "Take it easy; didn't you see that notice—'Slow Down Here?'"

Motorist: "Yes, officer, but I thought it was describing your village."

The body of a full-grown elephant contains about 70 gallons of pure oil.

2150

"I never knew there was so much difference in mustard! I thought I was economizing when I got more of the cheap mustard for my money!"

"I've learned my lesson! It doesn't pay to waste good materials by using a substitute for Pure Mustard. I'll stick to KEEN'S D.S.F. MUSTARD."

Made from seed grown in the Fens of England. Shells or hulls are removed and only the inner part of the seed is used. Superfine grinding ensures the full mustard flavour.

In original tins for as little as 10¢

D.S.F. **Mustard**

Little Helps For This Week

Am I my brother's keeper? Genesis 4:9.

Because I held upon my selfish road, And left my brother wounded by the way, And called ambition duty, and pressed on— O Lord, I do repent.

How many are the sufferers who have fallen amongst misfortune along the wayside of life. "By chance" we come that way, chance, accident, Providence had thrown them in our way. We see them from a distance like the Priest, or we come upon them suddenly like the Levite. Our pleasure or our business is interrupted by the sight, or troubled by the delay. What are our feelings and our actions toward them? "Who is thy neighbor?" It is the sufferer, whoever, wherever, he be. Whenever you hear the cry of distress, whenever you see anyone brought across your path by the chances and changes of life (that is by the Providence of God) and whom it is in your power to help, stranger or enemy though he be, he is your neighbor.

Using Old Water System

Lines Laid Down By Caesars Solving Problem In Egypt

The problems of water supply in the western desert of Egypt are being solved by the British on lines laid down by the old Roman armies.

Roman legions dug a labyrinth of cisterns underground, ranged in a series of galleries like those in a mine, and extending two or three miles. From these cisterns an assuring supply of sweet water can be taken.

Excavation of these cisterns is going forward daily, and they are now one of the main sources of supply.

It is supposed that these reservoirs were used to store fresh water in rainless years of the early Christian era, when, according to the story, this region was the granary of Rome.

Work Among Lepers

Missionary Doctor Finds Them Easy To Get On With

"Lepers are much easier to get on with than any other people I know." This statement was made by Dr. J. M. Howie, of the Church of Scotland Mission, Calabar, in addressing a meeting of the Mission to Lepers here. The Church of Scotland Mission, he said, cared for some 1,600 or 1,700 lepers in Nigeria, and in that country there were under treatment by the various missions some 5,000. But for every one that was being cared for, there were 20, 30, or maybe, 50 not being cared for. His Mission had not the money to care for any more. — Edinburgh Scotsman.

The Indianapolis News thinks that Heaven is a place where one is dry, warm, fed and safe. An American doesn't need to go to Heaven to get that. He can go to prison, says the Detroit Free Press.

Governor — "These sacks are wretchedly made." Convict — "If my work does not satisfy you, I can leave."

Rhubarb belongs to the buckwheat family.

CORN PAIN AND WOTTA WART

Undesirable guests of Mrs. Public were removed by Corn Salve. Price 50¢ a Jar. Try Cream BUNION Salve. It's good too. Made in Canada. Sold by all Drug and Dept. Stores. Distributed by Harold F. Ritchie & Company Ltd., Toronto.

ABBOTSFORD

SPORT SIFTINGS

Junior box lacrosse games continue with great gusto. Some neat stick-handlers are being developed among the teams, and the enthusiasm shown bids well for the future of the sport. Lacrosse boxes are springing up all over the Valley now, and perhaps the local teams, both senior and junior, may get some worthwhile games this season.

Abbotsford senior lacrosse players are scheduled to journey to Coquitlam in the very near future. If the Coquitlam boxers, players show the same ferociousness as their brethren on the soccer field, it should be a bloodthirsty battle!

Matsqui junior boxers last Wednesday, by a score of 14-5. Ray Norrish, with five goals, Kirk Norrish, three, and Ray Jones, three, were high scorers for Matsqui. Knox got two goals and two assists, and Beeststone, two goals, were the scorers for Huntingdon. Matvey, in goal for the losers, played a very good game.

The SNAPSHOT GUILD

"Off-Guard" Photography

Patient and strategic stalking of the subjects until they were "off guard" netted these interesting snapshots.

TAKING snapshots of people when they are not aware that they are about to be "shot," thereby catching them with natural expressions and in unposed positions, is often called "candid" photography, but we of The Snapshot Guild like the words "off-guard" photography as more truly descriptive.

"Candid" implies there is that kind of expression on the face of the subject and it may not always be there, but there is no doubt that for a natural expression he must be "off guard" at the moment the picture is made, which is also just what the professional photographer waits to capture in making a studio portrait.

"Off-guard" photography is lots of fun, but there are important points about it that need to be observed to get satisfying results. You can't "shoot" thoughtlessly without regard to the direction and strength of the light, nor can you forget that exposure and focus are just as important as for a premeditated pose. Nor should you overlook background. This means that if you are going to catch your subject unawares, you may have to do some strategic stalking for the right position.

Supposing, for example, you want a picture of Grandpa outdoors amusing one of the children. First, observe the intensity of the light and

where it will come from when you take the picture. Then, set your lens aperture and your shutter speed accordingly. Watch your subjects from a distance with your camera concealed. Be patient but alert for an interesting situation to develop. When you see the picture you want to take, locate the spot from which you are going to take it. Then, unless yours is a fixed focus camera, measure with your eye the distance from that spot to Grandpa and the youngster, set the pointer at the right mark, and, keeping the camera behind you until you get there, stroll up and shoot. If they look up at you before you get there, be nonchalant and wait for them to resume their activity, or make some casual suggestion that will put them "off guard." You see, in order to be a good "off-guard" photographer, you have to be "cagey," and this exercising of strategy to prevent people from posing is part of the fun.

Of course, you must know the capabilities of your camera. A camera with ultra-fast lens and shutter, plus supersensitive panchromatic film, greatly increases your range of opportunity especially for fast action, but the ordinary camera, too, will make "off-guard" snapshots if the movement of the subject is not too rapid.
